SURGERY INSTRUCTIONS

In addition to these instructions, you should have received a list of the necessary preoperative test that need to be done prior to your scheduled surgery. The tests must be completed and faxed or hand carried to this office at least one week prior to surgery. If the tests are being performed at the hospital where you are scheduled, then they must be completed at least 48 hours prior to the surgery. It is suggested that you have the tests performed at your primary doctor/family physician's office. Please take with you a current list of all medications that you are taking including any vitamins and herbs.

PLEASE REMEMBER:

- Stop all blood thinners and or aspirin products one week prior to surgery. You must discuss this with your ordering physician.
- Do not eat or drink **anything** after 12 midnight the day before your scheduled procedure.
- TAKE ALL BLOOD PRESSURE AND HEART MEDICATIONS WITH A VERY SMALL SIP OF WATER ON THE MORNING OF SURGERY.
- It will be necessary for someone that knows you to drive you to and from surgery as you will not be in any condition to drive yourself. You will not be allowed to take a taxi.

If you have any questions, please do not hesitate to call our office for further instructions.

THANK YOU.
